Chemical Sciences

Editor
V Krishnan
Indian Institute of Science, Bangalore

Associate Editor
S Chandrasekaran
Indian Institute of Science, Bangalore

Editorial Board

B Bagchi, *Indian Institute of Science, Bangalore*
D Balasubramanian, *Centre for Cellular and Molecular Biology, Hyderabad*
S Bhaduri, *Alchemie Research Centre, Thane*
A Chakravorty, *Indian Association for the Cultivation of Science, Calcutta*
B M Deb, *Panjab University, Chandigarh*
S R Gadre, *University of Poona, Pune*
K N Ganesh, *National Chemical Laboratory, Pune*
U R Ghatak, *Indian Association for the Cultivation of Science, Calcutta*
Harjit Singh, *Guru Nanak Dev University, Amritsar*
D V S Jain, *Panjab University, Chandigarh*
E D Jemmis, *University of Hyderabad, Hyderabad*
H Junjappa, *North Eastern Hill University, Shillong*
S S Krishnamurthy, *Indian Institute of Science, Bangalore*
G Mehta, *University of Hyderabad, Hyderabad*
S Mitra, *Tata Institute of Fundamental Research, Bombay*
C N R Rao, *Indian Institute of Science, Bangalore*
Surjit Singh, *Indian Institute of Technology, Madras*
J S Yadav, *Indian Institute of Chemical Technology, Hyderabad*

Editor of Publications of the Academy
G Srinivasan
Raman Research Institute, Bangalore

Subscription Rates
(Effective from 1989)

	1 year	3 years	5 years
All countries except India (Price includes AIR MAIL charges)	US$125	$340	$500
India	1 year	10 years	
	Rs. 75	Rs. 400	

All correspondence regarding subscription should be addressed to **The Circulation Department** of the Academy

"Notes on the preparation of papers" are printed in the last issue of every volume.

Proceedings (Chemical Sciences)

Volume 103, 1991

CONTENTS

Inorganic and Analytical

Hydrogenation of olefinic substrates in aqueous and aqueous-organic biphase systems using rhodium complex of sulphonated triphenyl phosphine *V R Parameswaran and S Vancheesan* 1–7

Recovery of sodium chloride, sodium sulphate and sodium carbonate from Sambhar Lake brine – A theoretical study *V R K S Susarla, J M Parekh and U V Chitnis* 9–16

Potentiometric studies on the complexation equilibria involving diacetyl-mono(lepidyl) hydrazone and bivalent metal ions in aqueous ethanolic medium *B S Garg, Manjurani Choudhury and Ranjana Dixit* 17–24

Oxidation of dyes by manganese tetraphenyl porphyrin activated peroxy bleach *R G Bhirud, E V Srisankar and K S Narayan* 83–93

Liquid–liquid extraction of copper(II) with dialkyl sulphoxides *M L P Reddy* 95–98

Polystyrene anchored rhodium(I) bidentate ligand complexes as catalysis for hydrogenation *V R Parameswaran and S Vancheesan* 99–106

Electrochemical behaviour of Cu–NTA complexes *R M Krishnan and V S Muralidharan* 107–118

Complexing tendencies of UO_2^{2+} and Th^{4+} in their mixed ligand complexes with aminopolycarboxylates and resorcinol or its derivatives *R K Singh and M C Saxena* 119–122

Poly(1,3-[2-methoxy-4-hydroxy-5-acetylphenylene]butylene) (HMAP–BG) as a polymeric ligand *H D Upadhyaya, P P Patel and M N Patel* 123–132

Closed shell-closed shell S,S-bridged heteropolymetallic aggregates: Synthesis and characterisation *R G Bhattacharyya and R Mishra* 525–538

Synthesis and spectral studies on Co(II) and Ni(II) complexes with polyfunctional quinazoline-(3H)-4-ones *B Prabhakur, P Lingaiah and K Laxma Reddy* 599–605

Studies on salicylaldehyde-2-aminobenzophenone-2-thenoylhydrazone active O-hydroxynaphthoquinone and its derivatives
R K Sharma and S K Sindhwani 607–612

EPR of vanadyl ion in a natural mineral, apophyllite
Geetha Ramakrishnan, M B V L N Swamy, P Sambasiva Rao and S Subramanian 613–619

Studies on salicylaldehyde-2-aminobenzophenone-2-thenoylhydrazone complexes with 3*d* metal ions *B Singh and A K Srivastava* 691–699

Studies on 4*f*-metal(III) complexes of N-thiophene-2-carboxamido-salicylaldimine *B Singh, P K Singh and V P Tiwari* 701–706

Studies on Schiff base complexes: Formation constants of Cu(II), Ni(II) and Zn(II) complexes on N-salicylidene-L-valinate, L-phenylalaninate and L-tryptophanate systems
K Rengaraj, B Shivasankar, M Anbu and M Palanichamy 707–713

Thermal and photoreactivities of oxalato*bis*(polypyridyl)chromium(III) complexes in aqueous medium *K Anbalagan and P Natarajan* 715–724

Complexes of some lanthanide with acetoneisonicotinoyl hydrazone: A synthetic and spectral study *Genda Singh, Madhu R Srivastava, Pariti S S J Sastry and T R Rao* 725–733

Photoinduced inter- and intramolecular electron transfer reactions of carboxylatopentaamminecobalt(III) and excited state *tris*(2,2′-bipyridine) ruthenium(II) complexes *R Ramaraj and C Chitra Thomas* 735–740

Special Issue on Lasers in Chemistry, Proceedings of the Conference of the International Centre for Pure and Applied Chemistry, Trieste, June 1990

Foreword *Mostafa A El-Sayed and Gallieno Denardo* 201

Thermal detection laser spectroscopy of molecular beams *G Scoles* 203–209

Sub-Doppler laser spectroscopy of molecules and clusters in cold beams
F Bylicki, W Demtröder, H A Eckel, J Gress, E Mehdizadeh and G Persch 211–224

Laser and synchrotron-based sources for excited state intramolecular dynamics studies *Sydney Leach* 225–236

Laser diagnostics of elementary processes in molecular beam scattering on surfaces *F Pradère, A De Martino and C Flytzanis* 237–249

Theoretical methods for the calculation of the multiphoton ionisation cross-section of atoms and molecules *R Moccia* 251–263

One- and two-photon spectra of some selected molecules: a comparative study *M Chowdhury, T Chakraborty, T Kundu, L Kundu, A K Banerjee, D Nath and S P Bhattacharyya* 265–276

Size dependence of gaseous cluster reactivity as a mechanistic probe
M A El-Sayed 277–282

From femtoseconds to biology: Mechanism of bacteriorhodopsin's light-driven proton pump *Richard A Mathies* 283–293

Laser Raman spectroscopy and its applications – especially in structural phase transitions *H D Bist* 295–304

Diffuse reflectance laser flash photolysis of adsorbed molecules *F Wilkinson* 305–311

Laser vaporization: A versatile method for studying metal clusters *V E Bondybey, I Fischer and R Schlachta* 313–323

Laser production of clusters as precursors of ceramic materials, semi- and superconductors *A Giardini Guidoni* 325–349

Anisotropy studies of ultrafast dipole reorientations *R M Hochstrasser, M A Pereira, P E Share, M J Sarisky, Y R Kim, S T Repinec, R J Sension, J R G Thorne, M Iannone, R Diller, P A Anfinrud, C Han, T Lian and B Locke* 351–362

Theoretical aspects of IR-laser induced dissociation and desorption processes *Adolf Miklavc* 363–367

Theoretical investigation of internal conversion in chromyl chloride *S Rashev* 369–373

Spectral hole-burning and holography *Keith Holliday, Changjiang Wei, Alfred J Meixner, Alois Renn and Urs P Wild* 375–381

Multiresonance CARS spectra of quinizarin in chloroform solution *C Ferrante, A Feis and R Bozio* 383–387

A new tunable 1 ps laser source applied to time-resolved absorption spectroscopy of dye solutions *Nguyen Dai Hung, P Plaza, M M Martin and Y H Meyer* 389–393

Time resolved fluorescence spectroscopy *Ekkehard Görlach, Hansruedi Gygax, Paolo Lubini and Urs P Wild* 395–400

SO_2 absorption of the CO_2 laser emission measured by the photoacoustic technique *Ljubica T Petkovska, Bojan B Radak, Sćepan S Miljanić, Raymond T Bailey, Francis R Cruickshank and David Pugh* 401–404

CH_3F absorption of the CO_2-laser emission measured by the photo-acoustic technique *Sćepan S Miljanić, Bojan B Radak and Ljubica T Petkovska* 405–408

Buffer gas effect on laser photoacoustic spectra of methyl chloride *Bojan, B Radak, Ljubica T Petkovska, Sćepan S Miljanić, Raymond T Bailey, Francis R Cruickshank and David Pugh* 409–412

Energy transfer kinetics in the green bacterium *Chloroflexus aurantiacus* *Lars Olof Pålsson, Mette Miller and Thomas Gillbro* 413–416

Mechanism of vibrational relaxation and intersystem crossing within excited ion-pair states of I_2 *Ágúst Kvaran, Svava Ósk Jónsdóttir and Thorgeir E Thorgeirsson* 417–428

Features in the vibrational relaxation of laser excited Freon-22 molecules *V Tosa, S Solimeno, R Bruzzese and C De Lisio* 429–433

Flexibility of the aldolase molecule measured using quenching-induced variations of the Forster distance for fluorescence energy transfer *Piotr Dobryszycki, Dorota Krzyzanowska and Marian Kochman* 435–440

Photochemical isomerization in the absence of a potential barrier *Ulf Åberg and Villy Sundström* 441–446

Isomerism in jet-cooled 1-cyanonaphthalene complexes *F Lahmani, A Zehnacker-Rentien and E Breheret* 447–453

Multiphoton geometrical isomerization of ClFC = CFCl. Selective purification of the *trans* isomer *E A Coronado and J C Ferrero* 455–457

Multiphoton dissociation of some aromatic molecules. Formation of atomic carbon in the $2p^2$, $^1S_0$ excited state *J Philis* 459–463

IR multiphoton dissociation of CF_3I. Pressure effect with inert and reactive gases *C A Rinaldi, J C Ferrero, S I Lane and E V Oexler* 465–469

^{13}C separation by IRMPD of CF_2HCl molecules with a powerful CO_2-TEA laser *I Deac and V Cosma* 471–475

Charge transfer and van der Waals states of jet-cooled dialkylaniline complexes with anthracene *F Piuzzi* 477–485

Simultaneous photolysis of directly linked porphyrin–diazonium salt molecule *Jaroslaw Zieba and Wojciech Pfloegel* 487–497

The kinetics of hydroxyl radical reactions with cyclopropane and cyclobutane *S Dóbé, T Turányi, T Bérces and F Márta* 499–503

Chloride-catalyzed oxidation of phenol in pulsed-laser irradiation titanium dioxide sols *Guozheng Li, Gottfried Grabner, Ruth Quint, Raimund Quint and Nikola Getoff* 505–511

Adsorption processes on semiconductor colloids studied by pulsed-laser-induced electron-transfer reactions *Gottfried Grabner and Ruth M Quint* 513–516

Effect of trace elements on carbon microparticle formation *A W Allaf, S P Balm, R A Hallett, K G McKay and H W Kroto* 517–523

Organic

A study of ethoxymethylation in the 3-position of chroman-4-ones *Amolak C Jain and Rene Saksena* 25–31

The synthesis and evaluation of 2-imino-3-(4-arylthiazol-2-yl)-4-thiazolidinones and their 5-arylidene derivatives as potential agricultural fungicides *Ram Lakhan and Ram Lakhan Singh* 33–41

Synthesis of substance P partial sequential peptides on a photolytically removable 4-aminomethyl-3-nitrobenzoylaminomethyl polystyrene support *V K Haridasan and V N Rajasekharan Pillai* 43–53

Peptide synthesis catalysed by papain immobilised on polymer supports: Effect of the macromolecular structure and reaction conditions on synthesis *V G Jayakumari and V N Rajasekharan Pillai* 133–148

Kinetics of formation of 1,1′-*bis*(3-methyl-4-hydroxy phenyl) cyclohexane *H H Garchar, H N Shukla and P H Parsania* 149–153

2-hydroxy, 4-methoxy-propiophenone–urea–formaldehyde copolymers and their application as ion-exchanges *Gajendra C Patel and M M Patel* 539–547

Synthesis and characterisation of 1-methacroyl-3-salicyloyl-2-hydroxy propane and its derivatives – A structure–reactivity kinetic study *N Vijaya Babu, K C Rajanna and C Janaki Ram Rao* 549–556

Reactions of cyclic anhydrides. Part XXII. Direct synthesis of N-aryl-α-(2,3,4,5-tetrahydro-2-imino-4-axo-1,3-thiazole-5-yl) acetamides *V Balasubramaniyan, P Balasubramaniyan and M J Wani* 621–629

Dipole moments of aryl *cis*- and *trans*-styryl sulphides and sulphones *V Baliah and T K Rathinasamy* 631–636

Mechanism of permanganate ion oxidation of diaryl sulphoxides – A kinetic study *S Rajagopal, Geetha Sivasubramanian, R Suthakaran and C Srinivasan* 637–643

Biomimetic oxidation of N-nitrosodibenzylamine with molecular oxygen catalysed by chemical cytochrome P-450 in AOT reverse micelles *S M S Chauhan and S Satapathy* 645–653

Oxidation of primary amines with dioxygen catalysed by an oxygen carrier cobalt(II) schiff base chelate, CoSMDPT *Prahlad A Ganeshpure, A Sudalai and Sheo Satish* 741–745

Kinetic study of oxidation of some thioacids by *bis*(2,2′-bipyridyl) copper(II) permanganate *Seema Kothari* 747–752

Physical and Theoretical

Kinetics and mechanism of oxidation of carbohydrazide and thiocarbohydrazide by N-bromoacetamide *B Thimme Gowda and P Jagan Mohana Rao* 55–68

Conductometric study of charge transfer complexes *Bharati Bhattacharjee and S N Bhat* 69–76

Conformational analysis of cinnamanilides *G Venkateshwarlu and B Subrahmanyam* 155–160

An insight into the self-discharge of Fe_3O_4 electrodes in alkali solutions *M Jayalakshmi and V S Muralidharan* 161–171

Heterotropic binding of alclofenac and dansylsarcosine to bovine serum albumin *Meenakshi Maruthamuthu and S Kishore* 173–183

Catalytic hydrogen currents at DME in the presence of thio compounds *K Saraswathi, K Yamuna and K A Emmanuel* 185–187

Enthalpies of mixing of acetonitrile with isomeric butanols: Enthalpies of hydrogen-bonded complexes *Gopal Pathak and Shirish Pradhan* 189–193

Magnetic field effect on the exciplex luminescence as a probe for estimating the hyperfine interaction in a radical ion pair system *S Basu* 557–562

Kinetics and mechanism of the oxidation of some hydroxyacids by pyridinium fluorochromate *Rachna Asopa, Saraswati Agarwal and Kalyan K Banerji* 563–570

Vibrational studies of nickel porphins and octaethyl porphyrins *Y A Sarma* 571–581

Improved hardness parameters for molecules *P K Chattaraj, P K Nandi and A B Sannigrahi* 583–589

Design and fabrication of an indigenous molecular beam ultraviolet photoelectron spectrometer *T Pradeep and M S Hegde* 591–597

Formation of lead pyrophosphate glass and the role of anion disproportionation *S Ananthraj and K J Rao* 655–666

Redox reactions of 2-hydroxy pyridine: A pulse radiolysis study *D B Naik and P N Moorthy* 667–675

Underpotential deposition of copper on electrochemically treated polycrystalline Au surfaces *K L N Phani, S Mohan and R Venkatachalam* 677–683

Electrochemical characterisation of porous iorn electrodes *M Jayalakshmi and V S Muralidharan* 753–761

Inhibitory effect of 2-mercapto pyrimidine on corrosion of copper single crystal planes in 0·1 M H_2SO_4 *L S Nandeesh and B S Sheshadri* 763–775

Electronegativity of the ionic groups. Evaluation from MNDO calculations *Dipankar Datta and Devashis Majumdar* 777–783

Phase transfer catalysis: Kinetics and mechanism of hydroxide ion initiated dichlorocarbene addition to styrene catalysed by triethylbenzylammonium chloride *T Balakrishnan, T K Shabeer and K Nellie* 785–793

Rapid Communications

Relaxation dominated by inertia: Solvation dynamics of a small ion in a dipolar solvent *A Chandra and B Bagchi* 77–82

Are all charge-repulsed carbocations really unstable? Dramatic difference in reactivities of benzyl- and *p*-methoxybenzyl halides in benzene *R Usha, Nanasaheb P Thakare, Shriniwas L Kelkar and Murzban S Wadia* 195–200

Buckminsterfullerene, C_{60}: Improved synthesis, electron microscopy, electron states, anions and related aspects *T Pradeep, F D'Souza, G N Subbanna, V Krishnan and C N R Rao* 685–689

Subject index 795–806

Author index 807–812
